WORK EXPERIENCE

Full Stack Java developer position

Value Digital Services

Dec 2023 - current

Tunis, Tunisia

- Developed and maintained backend services for a corporate banking platform serving enterprise clients.
- Designed and implemented asynchronous notification systems using ActiveMQ to ensure reliable real-time communication
- Integrated multiple enterprise systems including Keycloak (authentication), T24 (core banking), and Backbase.
- Ensured seamless communication between microservices in a distributed architecture
- Contributed to CI/CD pipelines and deployments using Jenkins and OpenShift
- Collaborated in Agile/Scrum environment with bi-weekly sprints and client demos

Technical Skills: Spring Boot, Backbase, Keycloak, T24, Angular, Postman, Azure Data Studio, Jira, Confluence, Bitbucket, SonarQube, Nexus, Docker, Kubernetes, OpenShift, Jenkins.

Full Stack Java developer position

Majda Smart Solutions

Jun 2022 - Dec 2023

Tunis, Tunisia

- Development of the TRADE application for Zitouna Bank is a solution for money transfer, domiciliation and management of ongoing commercial transactions. Teamwork is being carried out by applying the Scrum methodology, with a sprint duration of two weeks.
- Ensure the integration of different tools such as ActiveMQ, T24, with our application.
- Contribute to the build and deployment process using GitLab.

- Development of the KYC application for Zitouna within a team applying the Scrum methodology, comprising one backend developer, one frontend developer, two QA testers, one business analyst, and one Scrum Master, with a sprint duration of two weeks.
- Implemented the prospect journey up to becoming a Zitouna client.
- Integrated certification and electronic signature with "SIRAT Shadoc Tunisia."
- Integrated APIs from T24 with the KYC application.

PROFESSIONAL SUMMARY

Full Stack Java Developer with 4+ years of experience delivering scalable applications in the fintech sector. Specialized in Spring Boot and Angular, with strong exposure to microservices architecture and DevOps practices (Docker, Kubernetes, CI/CD).

Experienced in working on enterprise banking solutions used by corporate clients, with a focus on performance, reliability, and secure integrations. Currently seeking an international opportunity to contribute to high-impact projects and grow in a challenging technical environment.
